#### **EXECUTIVE SUMMARY**

This report presents the results of an evaluation of the *Government on the Net O1 Conference*. It is based on participant comments gathered through more than 1,300 session-specific feedback report cards and some 160 post-conference telephone interviews; exhibitor comments collected through self-administered questionnaires; and, views of some 190 non-participants who are members of the target groups and who were joined by telephone.

#### **OBSERVATIONS**

- Overall, participants were satisfied with their experience.
- The 2001 conference was **better** than the 1999 conference from the point of view of the participants.
- Conference **strengths** include the workshops, the level of service offered and the quality of the communications.
- Conference **weaknesses** include the results derived from attendance, the cost and the lack of handouts.
- **Topics of interest** to participants and non-participants agree in part: new technology, e-government and Government On Line.
- **General awareness** of the conference is climbing.
- Word-of-mouth has supplanted the mailed flyer as the main information channel.
- Exhibitors were generally satisfied but their commitment is slipping because of cost considerations and of the lack of interest shown by attendees.

#### **RECOMMENDATIONS**

#### **Conference Format**

· Maintain the conference format and general philosophy.

- Keep listening to participants and improving the conference.
- Protect the conference assets (workshop, level of service, communications) with close attention to elements affecting the information and knowledge gained by participants (people learn in various ways and retention is increased by the use of multiple media).
- Make the conference more interactive: down-play traditional speaker sessions and add exchanges (electronic, small group and social).
- Maintain a segmentation at the conference between technology, policy and content; possibly add a design stream.
- Possibly add a Communications stream which would cover interactivity, marketing and the joint management of various communication mechanisms.

#### **Building Conference Results**

- Insist upon the distribution of handouts.
- Build an Internet-based archive of presentations and handouts; advertise it.

#### **Promotion**

- Continue to build a list of potential participants with address and e-mail.
- Use the conference proceedings as a promotional tool.

#### **Exhibition Program**

- If the exhibition component is to be repeated, maintain the assets which include the exhibition layout space and the contacts with other exhibitors.
- Build the exhibition component into the content of the conference.
- · Revise the cost structure.

# Chapter 1 INTRODUCTION

This report presents the results of an evaluation of the 2001 conference *Government on the Net*. The conference was held on April 23 and 24, 2001 at the Palais des Congrès in Hull; there were post-conference workshops on April 25. Attendance at the conference was about 630, including some complimentary registrations. There were 386 registered participants at the workshops. Fifty-two exhibitors rented space at the conference. The conference targeted federal public servants in the information area as well as webmasters and members of policy groups; it also aimed at line managers.

Three groups were included in the feedback exercise:

• conference **attendees** are of course prime targets for feedback. In addition to contributing to the profile of participants, these individuals can comment on the following aspects: ① why they decided to attend the conference, to identify which levers (e.g., promotion conduits, messages) are effective in attracting the target population; ② what they thought of each session, to feed into the development of the content and logistics of the next conference; ③ how they react to the entire

conference, to determine strengths and weaknesses of the conference and possible new design and promotion angles for next year;

- conference non-attendees are part of the target population, but declined to participate. Conference organisers need to know ① who they are, to improve communication targeting; ② why they did not participate; ③ what their needs are, to develop a conference program that will be attractive to them;
- conference exhibitors invested significant resources to display at the
  conference. It will be important to determine ① how they evaluate their
  likely return on investment; ② whether they would come back or
  recommend this experience to others; ③ which aspects could be
  improved.

These groups were canvassed using three concurrent methodologies:

- Immediate session-specific feedback in the form of **report cards** containing a few questions and open space. These report cards were distributed at the beginning the sessions and workshops and filled in on site. Ballot boxes were available at the back of the rooms for participants to deposit their cards. More than 1,300 such cards were completed. The card is reproduced in Appendix 1.
- A follow-up telephone survey of attendees and non-attendees. A structured telephone survey was conducted with some 160 attendees and 190 non-attendees, between May 16 and May 25, 2001. The questionnaire was based on issues raised by the organising committee, the 1999 conference questionnaire and the Common Measurement Tool developed under the auspices of the CCMD. Attendees were sampled from lists provided by the organizing committee; non-attendees were selected from lists produced using the Government Electronic Directory Service. The questionnaire itself and field results are presented in Appendix 2.
- Self-administered questionnaires with exhibitors during their last day
  of presence on site. The questionnaires were hand-delivered and the
  return could be done in-person on site during the same afternoon or by

fax. All exhibitors were telephoned three to five days after the conference to motivate them to complete the questionnaire. Thirty-three feedback forms were completed. The questionnaire itself and results are presented in Appendix 3.

The next three chapters highlight the results from each source. Chapter 5 summarises the conclusions.

### Chapter 2

### REPORT CARDS

Report cards were distributed at the beginning of each plenary, break-out session and workshop. More than 1300 were returned. Their format is reproduced in Appendix 1 along with the detailed frequency distributions of the various responses and the transcription of the comments.

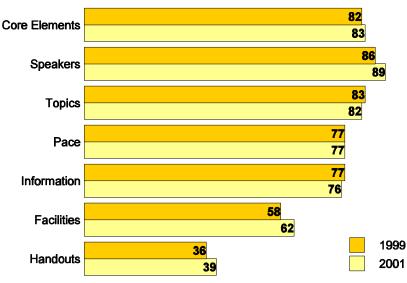

#### The results indicate that:

- The level of satisfaction with the quality of speakers and with the topics covered exceeded 80% overall (89% and 82% respectively) when considering the participants who rated "somewhat" and "highly" satisfied. Satisfaction with the speakers increased by a three percentage points from 1999 to 2001.<sup>1</sup>
- The pace of the sessions and the quantity of information gained rated a little lower, at 77% and 76%. These levels are unchanged from 1999.

Most differences in satisfaction ratings between 1999 and 2001 do not reach statistical significance, which is not surprising considering the size of the samples available for analysis. Nonetheless, the direction and magnitude of the changes are reported. The fact that most differences point in the same direction adds credence to the hypothesis that real change occurred between the two conferences.

- These four aspects (quality of speakers, topics, pace and information gained) are highly inter-correlated. Together, they form the core elements of satisfaction. On the basis of a summary scale including these four ingredients, 83% of participants rated the core elements satisfactory (44% highly satisfactory).
- Facilities were rated satisfactory 62% of the time. The level of dissatisfaction with facilities reached 18%. These numbers suggest a slight improvement from 1999.
- Handouts were the subject of criticism in 1999; they are still the main issue raised by conference participants. Of the less than half of report cards contained a rating about them, 39% contained satisfaction ratings while 29% pointed to dissatisfaction. While these numbers clearly indicate a weakness, they represent a slow improvement from the 1999 situation where 36% were satisfied with handouts and 38% were dissatisfied.

 Workshops were a success from the point of view of participant satisfaction: 89% were satisfied with the core elements and 60% were highly satisfied (unchanged from 1999); the handout rating achieved 73%.

- The Technology stream fared well, with 89% of satisfied participants (an improvement over the 82% rating of 1999); compared to the 60% of highly satisfied attendees with regard to workshops, the Technology stream comes in with 46% of highly satisfied participants.
- Plenaries garnered 81% of satisfied ratings (unchanged from 1999).
- The Content and Social Policy streams were the subject of more criticism than other groups of sessions: respectively 74% and 78% were satisfied with core elements. This represents a deterioration of the rating for the Social Policy stream (84% in 1999) and an improvement for the Content stream (69% in 1999).

- The highest score of satisfaction in each category went to the following sessions:
  - plenaries: closing presentation (95%);
  - Content stream: Interoperatability of content (90%, with a higher average rating); National culture in a global world (93%);
  - Social Policy stream: Strengthening of relationships between the government and the citizens (90%); Municipalities online (90%);
  - Technology stream: The Internet and the open source wave (98%);
  - workshops: Creating knowledge in the 21st century (94%).

### Chapter 3

# PARTICIPANTS AND NON-PARTICIPANTS

This chapter reviews the results of a telephone survey of 157 conference participants and 188 non-participants. The questionnaire, methodology, field results and detailed frequency distributions are presented in Appendix 2.

#### 3.1 Participants

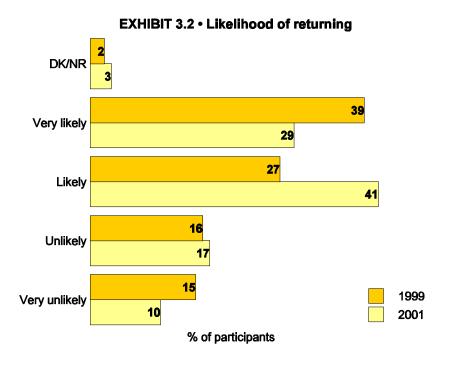

- The participant pool was composed of 20% of people whose job was Internet-related (31% in 1999); 39% had employment in the information field (42% in 1999); and, 38% were active in the policy and program field (24% in 1999). The shifting emphasis of the conference toward the policy and program personnel appears to have borne fruits.
- One in ten (10%) registered individuals did not attend the conference (22% in 1999).

• 28% of participants learned about the conference by word of mouth which is stable compared to 1999; the emphasis on the mail flyer has considerably decreased, however, from 36% to 22%. This decrease is compensated by smaller increments in the importance of a variety of other promotional tools: the Web site (17%), promotional material received elsewhere than in the mail (14%), e-mails (or "electronic word-of-mouth", 6%) and other means (11%).

**EXHIBIT 3.1 • Source of information in Govnet** 26 Word of mouth 28 36 Flyer in the mail 22 15 Web site 17 9 Promo other than mail 14 Other 11 E-mail 1999 **DK/NR** 2001 % of participants

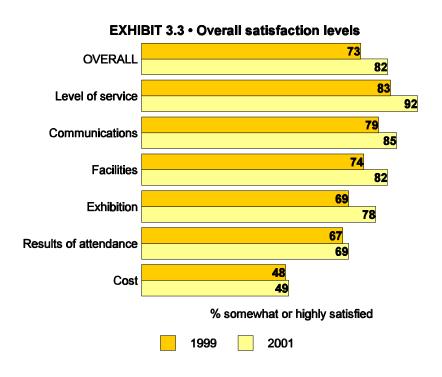

- The majority (71%) of participants attended the conference to keep abreast of the state of the art; roughly similar-size groups indicated that their prime goal was to keep themselves informed (8%), to network (8%) and to get training (6%). The patterns of participant objectives is similar to that uncovered in 1999.
- The overall satisfaction level was 82%. This represents a sharp increase from the 73% satisfaction level of 1999.
- Seven out of ten (71%) participants declared being likely to attend another Government on the Net conference next year (compared to

67% in 1999). Because of the reduction in the proportion of participants saying they were "very likely", the overall likelihood has remained the same.

- Satisfaction with the level of service obtained is highest, at 92%, a nine-point increase over 1999. It is even higher in relation with the courtesy of personnel (94%). It lags somewhat in the balance between private and public sector speakers (70% 68% would have preferred more private sector speakers, 32% fewer) and in the balance between French and English speaking speakers (64% 59% would have preferred more French-speaking speakers, 30% fewer; this is in sharp contrast to 1999 where several participants found there were too many French-speaking presenters). Participants were less satisfied with the availability of handouts (53%; a significant gain however over 1999 where only 34% were satisfied).
- Participants were satisfied with the quality of communications (85%, up from 79% in 1999) although they would appreciate clearer promotional materials (71% satisfied).

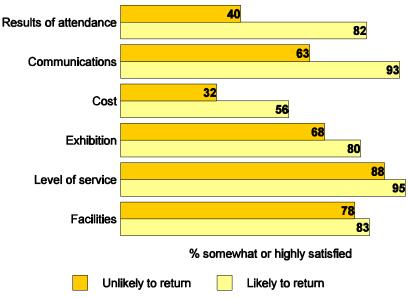

The conference facilities were considered adequate (82% satisfied, up from 74% in 1999). Parking was not satisfying (24% satisfied, up from 19%) for the 75% of participants that it concerned. Also, temperature control was criticized by many (42% satisfied, down from 52% in 1999).

- The exhibition component left 78% of participants satisfied, an increase over the 69% from 1999.
- The results derived from attendance was satisfying for 69% of participants (similar to 1999). Tossing out the participants who expressed indifference toward each content stream and using the ratio of satisfied over dissatisfied participants, it appears that the Social Policy stream garnered the most favourable score (4.8), followed by the Content stream (4.4) and the Technology stream (4.0).
- Some 63% were satisfied with the extent to which the conference met their needs (similar to 1999).

- As in 1999, half of participants (49%) were satisfied with the cost levels set for the conference.
- Satisfaction with the results derived from attendance is the key aspect
  which distinguishes those who are likely to attend next year (82%
  satisfied) and those who are unlikely (40% satisfied). That aspect of
  managing the conference is the key driver for return business not
  level of service or the exhibition program. Within that dimension,
  participants emphasized the information and knowledge gained.

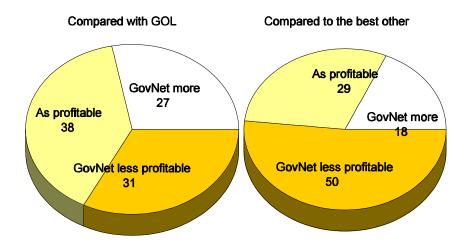

EXHIBIT 3.4 • Satisfaction and likelihood of returning (ordered according to the gap in satisfaction)

Participants would have liked to see the following topics covered more fully: new technologies (10%), e-government and Government On Line (6%), experiences of other departments (4%) and a global government vision of the place of the Internet (3%). Almost six out of ten participants had no suggestions (47%) or could not provide an answer (10%), up from about four out of ten in 1999 — thereby suggesting that the topics offered better met the participants' needs.

- 43% of participants had attended another, similar conference in the previous twelve months (similar to 1999). Some 38% of them mentioned IQCP's Government Online conference.
- Govnet was considered at least as profitable as IQPC's Government
  Online conference by 38% of participants; similar size groups preferred
  Govnet (27%) and IQPC's conference (31%) over the other. Compared
  to the best of the other conferences attended (excluding IQPC's GOL
  conference), GovNet was at least as profitable for 47% of participants
  (up from 34% in 1999) and less profitable according to 50%.

EXHIBIT 3.5 • Comparison of GovNet and other conferences (conference participants)

#### 3.2 Non-Participants

 The non-participant pool was composed of 20% of people whose job was Internet-related (webmasters and other Internet-related jobs, according to question 22 of the survey); 39% had employment in the information field (information-related staff and communications staff, according to the survey); and, 38% were active in the policy and program field (program managers and policy analysts, according to the survey). This distribution is similar to the one obtained in 1999.

- Almost half (47%) of non-participants had heard of the Government on the Net 01 conference prior to April 23 (up from 34% in 1999).
- For one third (34%) of them, lack of time explained their non-attendance (down from 53% in 1999). Bad timing was cited by 30%, compared to 10% of mentions in 1999 this could suggest that the fall was a better time of year for Govnet than the spring.
- When probed about the topics which would be of interest to them in a conference focussed on government and the Internet, the following were mentioned by at least 10% of respondents:
  - client focus and citizen engagement (18%);
  - new technologies (17%);
  - e-government and Government On Line (12%);
  - security and privacy (12%);
  - the Internet as a communications medium (12%);
  - various aspects of Web content (10%).

#### 3.3 Conference format

 The traditional conference was considered by 66% of the GovNet target population to be the best way to meet people, exchange ideas and learn key trends (down from 72% in 1999); 17% would have preferred Web publishing and technology-based discussion groups; 17% did not take a stand on the issue.

### Chapter 4

#### **EXHIBITORS**

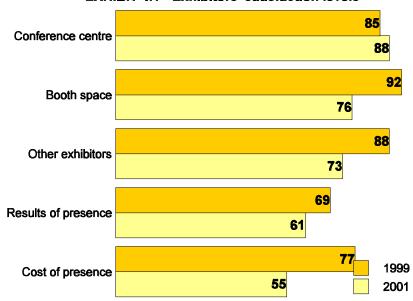

Contacts were made with every exhibitor at the conference to complete a two-page feedback form. All exhibitors were contacted again within one week of the conference to motivate them to return the questionnaire. Thirty-three forms were returned out of approximately 50 exhibitors. A copy of the form and detailed results are presented in Appendix 3.

The main findings are as follows:

- Exhibitors displayed a high level of satisfaction with the conference facilities (88%, similar to 1999).
- Exhibitors' reactions to the booth space they were offered and to the composition of the exhibitor pool were lukewarm (76% and 73%), in contrast with rating from 1999 which were some fifteen points higher.
- Of prime importance is the low level of satisfaction with the results of the exhibitors' presence at the conference, 61%, marking a decline from the 69% rating in 1999.

• In 1999, The cost of the presence at the conference was deemed reasonable by most (77% satisfaction); in 2001, price satisfaction ratings plunged to 55%.

- Overall, 67% of exhibitors stated that they are somewhat or very likely to return to the conference next year (similar to the result obtained in 1999). The figure is higher for federal organisations (74%) than for private sector companies (57%).
- The elements of satisfaction most closely related to the likelihood of returning are the exhibitor's reaction to the cost, the interest shown by attendees and the booth placement in the exhibits. Those likely to return were satisfied at 68% with the cost while those unlikely to come back were satisfied at 22%.
- In open responses, exhibitors suggested various mechanisms to augment traffic at exhibitors' booths.

## Chapter 5

### **CONCLUSIONS**

This evaluation contains a small number of important observations which are summarized below along with suggestions for improvements.

#### Overall, participants were satisfied with their experience.

- Observations 83% satisfied with core elements of the sessions.
  - 82% satisfied overall according to the postconference survey.
  - 71% of participants are likely to attend next year.
  - 66% of the market segment values traditional conferences over technology-based exchanges.

Suggestions

 Maintain the conference format and general philosophy.

The 2001 conference was better than the 1999 conference from the point of view of participants.

- Observations Satisfaction grew from 73% to 82%.
  - The level of service rating went from 83% to 92%.
  - Likelihood of attending again rose from 67% to 71%.
  - · Post-conference satisfaction with handouts increased from 34% to 53%.
  - · While still lagging, Govnet fares better in the comparison with the "best other" conference attended.

Suggestions

 Keep listening to participants and improving the conference.

Conference strengths included the workshops, the level of service offered and the quality of the communications

- Observations 89% satisfied with core elements for workshops on the basis of report cards.
  - 92% satisfied with the level of service.
  - 85% satisfied with the quality of communications.
  - Satisfaction with the Content stream increased from 69% to 84%.

Suggestions

- Protect the conference assets with close attention given to elements affecting the information and knowledge gained by participants (people learn in various ways and retention is increased by the use of multiple media).
- Conference weaknesses include the results derived from attendance, the cost and the lack of handouts.

Observations • 69% satisfied with the results derived from attendance; this includes the topics of each stream,

- the contacts made, the information gathered and the knowledge gained.
- Satisfaction with results derived from attendance is most closely related to likelihood to attend again.
- 49% satisfied with the cost.
- 39% satisfied with handouts on the basis of report cards (53% based on the post-conference survey).
- Satisfaction with the Social Policy stream declined from 84% to 74%.

#### Suggestions

- Make the conference more interactive by downplaying the traditional speaker sessions and adding exchanges (electronic, small group and social).
- Insist upon the distribution of handouts.
- · Build an Internet-based archive of presentations and handouts; advertise it.

#### Topics of interest to participants and non-participants agree in part: new technology, e-government and Government On Line.

- Observations Participants would have liked to see the following topics covered more fully: new technologies (10%), e-government and Government On Line (6%), experiences of other departments (4%) and a global government vision of the place of the Internet (3%).
  - Non-participants were interested in client focus and citizen engagement (18%), new technologies (17%), e-government and Government On Line (12%), security and privacy (12%), the Internet as a communications medium (12%) and various aspects of Web content (10%).

#### Suggestions

- Maintain a segmentation at the conference between technology, policy and content.
- Possibly add a Communications stream which would cover interactivity, marketing and the joint management of various communication

mechanisms.

 Word of mouth has supplanted the mailed flyer as the main information channel.

- Observations General awareness of the conference is climbing: almost half of non-participants had heard of the conference (up from 34% in 1999).
  - 34% of participants learned about the conference through word of mouth or e-mail.
  - 22% by the mailed flyer.
  - · Main information channels are getting more disparate.

#### Suggestions

- Continue to build a list of potential participants with address and e-mail.
- Use the conference proceedings as a promotional tool.
- Exhibitors were generally satisfied but their commitment is slipping because of cost considerations and of the lack of interest shown by attendees.

- Build the exhibition component into the content of the conference.
- Revise the cost structure.

# APPENDIX 1 Report card

The next page reproduces the report card used in each session (workshops and keynote speeches alike).

The format of the card was  $5"x8\frac{1}{2}"$ , printed on heavy stock. One side offered the English version, the other, the French version.

The card was distributed at the door for each event.

Cards were pre-coded to identify the event.

Data tables were built for the quantitative results. Comments were transcribed and listed according to the sessions; they were classified as "positive" or "negative" according to the area of the card in which they were written — note that participants did not necessarily always use the right area to record their comments.

- WHEN A PRESENTER IS GOING TO PRESENT IN ONE LANGUAGE -PUT IT ON THE PROGRAM
- TOO ACADEMIC NON PRACTICAL OR APPLICABLE IN MY WORK OR LIFE
- AUCUN DOCUMENT REMIS
- HARD TO LISTEN TO 1 PERSON TALK FOR AN HOUR. SOME SLIDES OR TIME QUESTIONS WOULD MAKE THINGS MORE INTERESTING WITH OVERALL CONFERENCE, IT IS TOO BAD THAT SPEAKERS DON'T RESPECT THE TIME LIMITS
- POWER POINT WOULD HAVE BEEN REINFORCED THE PRESENTATION

- WOULD HAVE BEEN MUCH BETTER IF HE HAD VISUALS AIDS-TITTLE OF SESSION NOT COVERED IN HIS TALK-THIS SHOULD HAVEBEEN CALLED THE HISTORY OF THE NET
- SPEAKERS HAVE HAD A HARD TIME TO RESPECT THE TIME ALLOWED.
   THIS CREATES A LACK OF INTEREST EVEN IF THE TOPIC IS GREATLY
   INTERESTING
- I WOULD HAVE LIKE TO SEE SOME VISUALS SUCH AS SLIDES POWERPOINT, WICH WOULD HAVE ADDED TO THE PRESENTATION. HE SPOKE A BIT FAST
- SESSION STARTED 20 MIN LATE-NEED BETTER TIME MANAGMENT
- TO WARM IN ROOM
- FACILITIES-CHAIRS TOO CLOSE

- BEST SESSION OF THE CONFERENCE. CONTENT VERY RELEVANT
- GREAT TOPICS-LIVELY + FUN SPEAKERS-GOOD TIMING. MOVED WELL
- TALK ON THE SESSION BY HUDON AN EXPERT WHO IS ALSO IN TOUCH WITH THE FED GOV'T SITUATION
- INFO WAS INTERESTING
- EXCELLENT

- SOUND & AIR MUCH BETTER TODAY MAKES FOR MORE EFFECTIVE PRESENTATIONS
- ROOM TOO SMALL FOR GROUP SIZE
- A BIT HOT
- PRESENTATIONS PROJETEES NON-BILINGUE
- THE META-THESAURAS IS A CONCEPT THAT HAS PROVED IMPOSSIBLE TO IMPLEMENT
- NOT ENOUGH TIME TO READ INFO-IE HON TO OR HOW DOES IT WORK NOW
- MANQUE DE SUBSTANCE DE LA PRESENTATION DE MILLER
- HUDON'S PRESENTATION WAS DIFFICULT TO SEE FROM THE BACK OF THE ROOM- THE SAME WAS FOR BAILLARGEON
- WOULD HAVE LIKED THE SPEAKERS TO HAVE HAD MORE TIME. IN THIS CASE, NOT ENOUGH TIME
- TO IMPROVE FOR NEXT YEAR ADD A LIST OF URLS (MAJOR URLS) OF SUBJECTS DISCUSSED BY SPEAKERS, FROM DESCRIPTION OR AS AN INDEX OR APPENDICES
- TROP LONG, PAS ASSEZ DE TEMPS POUR LES DISCUSSIONS INTERACTIVES PENDANT LES PRESENTATIONS

- ALL SLIDES SHOULD HAVE BEEN AVAILABLE IN FRENCH
- IT WASN'T AT ALL WHAT I EXPECTED I WISH THAT THEY WOULD HAVE BEEN HANDOUTS
- WOULD LIKE HANDOUTS OF A SITES CITED BU SPEAKERS-MORE TIME SHOULD HAVE BEEN ALLOTED FOR THESAURAS

#### What the Internet cannot do

- PAQUET IS A VERY INTERESTING + ENTERTAINING SPEAKER
- PAQUET SHOULD HAVE BEEN THE KEYNOTE SPEAKER. WE DON'T NEED TO PAT OURSELVES ON THE BACK BUT TO HAVE OUR IDEAS PLAN CHALLENGED, EXCELLENT PRESENTATION
- PAQUET WAS AS USUAL VERY THOUGHT PROVOQUING
- PAQUET PROVIDED A GREAT DEAL OF THINKING MATERIAL. TOO BAD HE DIDN'T HAVE MORE TIME
- PAQUET A MEALT OF FRESH AIR A WELCOME INTELLECTUAL
- EXCELLENT PRESENTATION
- PAQUET PRESENTATION WAS THE MOST INTERESTING AND STIMULATING OF THE ENTIRE CONFERENCE. THIS IS IN CONTRAST TO ALL THE BUREAUCRATIC PRESENTATIONS BY THE OTHERS ON THE VARIOUS PROGRAM AGENDAS
- PAQUET IS A GREAT SPEAKER ARE THESE MORE OF HIM
- PAQUET'S FRANCHERS + PROVOCATIVE HONESTY
- BEST MODERATER YET-CLEAR PRECISE I WOULD LIKE TO SEE PAQUET MORE OFTEN -REFRESHING VIEW POINT
- EXPERIENCES VECUES EN MILIEU RURAL ET PAR L'EXPOSE DE PAQUET POSE DES JALONS INTERESSANTS POUR UNE PRISE DE CONSCIENCE DU GRANDISSEMENT DE L'INTERNET
- PAQUET A SOULEVE D'EXCELLENTS POINTS
- LE DISCOURS DE PAQUET ETAIT TOUT PARTICULIEREMENT INTERESSANT
- QUALITE DES PRESENTATIONS L'ASPECT CONTROVERSE
- CONTROVERSIAL OPINIONS-I DIDN'T AGREE WITH THE QUESTIONNER WHO CLAIMED THE QUESTIONS WASN'T ADRESS
- THE WEAKNESS OF THIS CONFERENCE IS THE SAME AS LAST TIME
  THE PEOPLE DOING THE SMALL PRESENTATION ON TALK ABOUT THEIR
  OWN PROJECT AND IN SUCH SPECIFIC TERMS, THAT THE
  PRESENTATION IS BORING AND USELESS
- PAQUET A FAIT UNE EXCELLENTE PRESENTATION-PEU DE REPONSES A L'EGARD DU THEME PROPOSE
- PAQUET'S PRESENTATION WAS REALLY LINKED WITH THE SUBJECT OF THE SEANCE
- BEST SESSION OF THE CONFERENCE

- VERY INTERESTING PRESENTATIONS I ESPECIALLY ENJOYED THE 2 SPEAKER'S PRESENTATION ON POVERTY AND ACCES TO INTERNET
- ONE PANEL MEMBER WAS PROVOCATING-THE QUESTION AND OTHERS ARE WHAT WE NEED TO KEEP REALITY CHECKING
- INTERVENTION OF A MEMBER OF THE AUDIENCE TO BRING A FOCUS TO ME SESSION
- TRES DIVERSIFIEE
- EXCELLENT PRESENTATIONS I LEARNED A GREAT DEAL AND I HOPE THAT THE PRESENTATIONS WILL BE AVAILABLE ELECTRONICALLY

- MCKENZIE TOO MUCH DETAILS ON SPECIFICS; NOT REALLY FOCUSSED ON TOPIC DIDN'T ADRESS QUESTIONS AT ALL. LAFOND WAS INTERESTING BUT HE DIDN'T ANSWER THE QUESTIONS EITHER. SOCIAL STREAM SHOULD BE PRESENTATIONS LIKE BULKA, HAM
- TOPIC SHOULD HAVE BEEN COOL STUFF WE DO WITH INTERNET. THIS DISCUSSION HAD NOTHING TO DO WITH THE LIMITATIONS OF THE NET EXCEPT PAOUET
- MACKENZIE'S MATERAIL WAS IRRELEVANT TO THE SUBJECT MATTER
- PRESENTATIONS DID NOT DELIVER WHAT I EXPECTED TO HEAR ACCORDING TO THE PROGRAM MOSTRACT FOR THE SESSION. THE IRAC PRESENTATION TOLD US WHAT THE INTERNET CAN DO IN UNDERDEVELOPED COUNTRIES WHERE IT IS AVAILABLE
- ALORS QUE LES INETERVENANTS N'ONT PAS CERNE LA QUESTION L'INFORMATIONS QU'ILS ONT PRESENTE ETAIT NECESSAIRE ET INTERESSANTES. JE RESTE SUR MON APETIT
- 2/3 OF THE SPEAKERS ONLY GAVE HALF A PRESENTATION-SHOWED WHAT INTERNET CAN DO. BUT NOT WHAT IT CANNOT DO
- WANTED MORE INFO ABOUT HUMAN BACKING TO THE NET PRIVATE INDUSTRY COULD DO BETTER OR A GOVERNMENT CALL
- THE SECOND SPEAKER DID NOT ADRESS THE TOPIC
- MACKENZIE CLEAR & ELOQUENT
- POURQUOI LES CARTONS D'EVALUATION SONT TOUJOURS DU COTE ANGLAIS SUR LES TABLES ET CHAISE CE POURRAIT ETRE 50/50
- THE FIRST 2 PRESENTATIONS HAD NOTHING TO DO COITH THE TITLE-PAQUET TALK WAS GOOD PLUMBING IS THE CORRECT ANALOGY
- MCKENZIE ETAIT ENNUYANTE-LAFOND N'A PAS SU RENDRE SA PRESENTATION TRES VIVANTE
- NE CORRESPOND PAS AU SUJET DE LA CONFERENCE
- NOW IT'S KIND OF ON THE COOL SIDE
- SPEAKERS JUST PROMOTING THEIR OWN PROGRAM WITHOUT ADDRESSING THE TOPIC OF THE PRESENTATION-LAFOND LONG PRESENTATION HAD ALREADY BEEN COVERED BY 2 SENTENCES IN GUEDON'S PRESENTATION

- PRESENTATION DU CRDI TRES MEDIOCRE
- A CAUSE DU FAIT QUE LE TEXTE DES PRESENTATIONS EST TRES PETIT, IL EST TRES DIFFICILE A LIRE. PLUSIEURS PRESENTATIONS N'ONT PAS ETE TRADUITES EN FRANCAIS
- THE ROLE OF A PANEL MEMBER TO USE HIS/HER EXPERIENCE TO FOCUS ON THE QUESTIONS AND NOT GLOW OF THE QUESTIONS-ONE NEXT YEAR WITH MORE DIVERGEANT VIEWER POINTS -MAYBE A CITIZEN PANEL
- FOCUS ON WHAT ME INTERNET DOES RATHER THAN ON ME LIMITATIONS
- MANQUE DE CONTEXTE (HUDON) 3 PRESENTATIONS C'EST TROP POUR LE TEMPS PREVU
- THE CONTENT HAD NOTHING TO DO WITH THE DESCRIPTION OF THE SESSION
- PANELISTS DID NOT ADRESS TOPICS

#### Internet futures: implications for governments

# APPENDIX 2 Telephone survey of attendees and non-attendees

The telephone survey took place between May 16 and May 25, 2001. Some 157 attendees were contacted to analyse their reaction to the conference in more detail than the report cards can offer; 188 non-attendees were questioned about the reasons for not attending and about their information needs.

Non-participants were selected at random from the telephone listings of the Government Electronic Directory Services. Listings were produced using the following keywords in titles: "communication", "policy analyst", "webmaster"and "Internet". Only telephone numbers in the 819 and 613 area codes were retained for the study.

The first three questions in the questionnaire acted as a filter to ensure that the individual contacted belonged to the right stratum. People registered to the conference but who did not attend were considered outside the population. Also, people on the non-participant list who had participated were excluded as were those who declared that their job did not involve government information and the Internet.

The next few pages contain the paper version of the telephone questionnaire.

# Q2 What is the most pressing suggestion you would like to make to organisers?

#### Federal government

- Find ways to improve traffic flow in the exhibit area-perhaps allow times between workshops.
- The ventilation throughout the conference space is not adequate to keep out cigarette smoke, some of which is quite obviously drifting up from the Place du Centre food court.
- More advertising to attract an increase in exhibitors. Allow free admittance to the exhibit for a specified time.
- · Have bigger tables, pamphlet rack, phone ligne for modem.
- Is this conference worth it? Turnout low.
- · Better marketing.
- Obtenir le programme et la liste des participants à l'avance.
- No parking! No cab stand!
- Do NOT schedule the conference to begin on a Monday because this
  forces exhibitors to incur additional costs for shipping and storage and
  presents difficulties in setting up for the conference on a weekend.
- Pas de nourriture ou on a besoin d'ustensiles alors qu'on doit manger debout; Quelques tables pour manger debout. Les gens mangeaient sur les cabarets à débarras...
- Assurez que les portes de la salle soient ouvertes toujours.
- The organizers were very helpful any issues were resolved quickly in good humour and well. Keep up the great work! Freeman Decorating, on the other hand, was disorganized, unhelpful, and didn't offer anywhere near the quality of service demonstrated by the organizers. Find a new supplier.
- Better way to differentiate on floor plan government vs private sector organizations; Lunch breaks standing was difficult. Some seating would be preferable.
- Increase advertising to exhibitors- the number of exhibitors has decreased in the past year.
- Better definition of audience- feels like attendees were at a family reunion: they spent more time visiting each other than they did visiting the exhibits.

#### Private sector

- · Please provide decaf coffee.
- Provide opportunity to view/sort participants via a database. Have participants/delegates complete some assessment of needs and include that in the database.
- Keep air temperature regulated; Have bottled water present.

- Stagger the conference start & stop times to facilitate more even traffic to the exhibit.
- · Chaque année, sans en sauter une.
- · Address the parking issue or change venues.
- More exposure/advertising on trade show; potential for anybody to pay walk up for trade show.

# Q3 How do you measure the success of your involvement in a conference like this one?

#### Federal government

- By the amount of contacts made, business cards collected, promotional material partners.
- Plus de visites aux sites, plus d'appels, abonnement au groupe.
- Feedback and reaction of visitors to our booth.
- · We would look to see if there was an increase in traffic to our sites.
- Our presentation was a demo for information purposes only. We get good feedback from people who visited our booth.
